Dear colleagues,

below you will find the list of people who will be responsible for data taking during the next couple of days. As our testbeam time is only until Tuesday morning at 8:00 we all have to do only 1-2 shifts. If you do not know how to handle the system, let me know, we will do a quick learning session. Please also remember that e.g Mo 0:00 means Sunday very late evening

Of course there is loads of things to do besides taking the data!

Have fun

Ingrid
