

This could be your EUDET-Report

G. Guignard¹, N. Walker²

August 20, 2007

Abstract

EUDET-Reports are refereed reports and should be the main scientific dissemination vehicle inside and outside of EUDET. A EUDET-Report submitted by an author or authors will undergo a review process initiated by the Steering Committee. After making sure that good scientific standards and EUDET procedures have been followed, the Steering Committee will assign the Report a EUDET-Report number and release it for publication. EUDET-Reports will be primarily available on www.eudet.org and are always accessible to the worldwide public. Publications in journals, proceedings to conferences, etc., emerging from EUDET are classified as EUDET-Reports, and will undergo the internal review process before submission and will be assigned a EUDET-Report number.
